

Press release

RWE once again successful in Italian advanced Agri-PV auction

- **Total of 30,2 MWac and approximately 47,000 solar modules to be installed across Italy**
- **Construction to start within the next weeks; commissioning scheduled for 2026**
- **Solar modules will be installed on elevated mounting structures**

Essen/Rome, 17 November 2025

RWE was once again successful at the Italian Resilience and Recovery Plan (PNRR) auction, which awards a contract for difference tariff and up to 40% return on investment for advanced Agri-PV. After having won the tender for two projects in [last year's PNRR auction](#), which are currently under construction, RWE has now been awarded three new Agri-PV projects with a total capacity of 30,2 megawatts (MWac). Acquafredda 2 (11,7 MWac) is located in the Campania region, Enna Piscopo (9,5 MW) in Sicily and Cave (9 MWac) in Calabria. Construction of the approximately 47,000 solar modules is scheduled to begin within the next weeks, with commissioning scheduled for 2026.

The three Agri-PV projects will use elevated mounting structures. Two of the projects will have high tracker structures with a movable axis, while the third will have a high, fixed-tilt structure, which is more compatible with the agrivoltaic-pastoral scope. Sheep will graze or crops will be harvested below the panels in a fully integrated energy-agri system, increasing agricultural yield while optimising land use. The panels provide protection against hail, frost, drought and heavy rain. To help improve the technology the performance of the three advanced Agri-PV systems and meteorological and agricultural yield data will be monitored by RWE.

Katja Wünschel, CEO RWE Renewables Europe & Australia:

“This is great timing. Shortly before the completion of our two Agri-PV projects from last year's auction, we now have the green light to start construction on three more projects using this innovative technology. Italy is taking the lead in Agri-PV because land is a scarce resource that must be used responsibly and efficiently. We look forward to continuing to support Italy's energy targets.”

RWE Renewables Italia – strong presence in Italian market for renewables

RWE is a key player in the Italian renewables market. The company takes an integrated project approach that incorporates the development, construction and operation as well as marketing of wind farms and solar plants. RWE operates 17 onshore wind farms in Italy, with a combined installed capacity of 598 MW – enough to supply more than 500,000 Italian households with green electricity every year. In addition to its first commercial-scale [Agri-PV plants](#) Morcone (9.8 MWac) and Acquafredda (9.3 MWac) in the Campania region, RWE is constructing [two new](#)

[onshore wind farms](#): The 47 MW Serra Palino wind farm is located in the Apulia region and the 45 MW Venusia wind farm in the Basilicata region.

RWE

RWE is leading the way to a clean energy world. With its investment and growth strategy Growing Green, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is already one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
