RWE commissions 53.1 megawatt wind farm in Italy

- **Mondonuovo onshore wind farm is located in the Apulia region**
- **9 x 5.9 MW turbines can supply up to 55,000 Italian households with green electricity**
- **RWE now operates 17 wind farms and one solar plant in Italy with a combined capacity of 589 MW**

Essen/Rome, 17 July 2025

RWE has commissioned one of its largest onshore wind farms in Italy after a year of construction. The 53.1 megawatt (MW) Mondonuovo wind farm consists of 9 turbines, each with a capacity of 5.9 MW. Located in Apulia in the province of Brindisi, in the municipality of Mesagne, the wind farm can supply green power to up to 55,000 Italian households. In total, 150 RWE colleagues and experts from external service providers were involved during the construction phase.

Katja Wünschel, CEO RWE Renewables Europe & Australia: “The commissioning of Mondonuovo wind farm is an important milestone in our journey to support Italy in building a clean, stable and cost-effective energy supply. A big thank you to the RWE team, the local community and all companies and partners involved. Now our Italian renewables fleet can supply more than 500,000 homes. Looking ahead, the next projects using the Italian wind and sun are in the starting blocks.”

RWE Renewables Italia – A strong presence in the Italian renewable energy market

RWE is a major player in the Italian renewables market. The company pursues an integrated project approach that includes the development, construction and operation as well as marketing of wind farms and solar plants. In Italy, RWE operates 17 onshore wind farms and one solar plant, with a total installed capacity of 589 MW, enough to supply more than 500,000 Italian households. The company is currently constructing the 9.8 MWac Morcone and 9.3 MWac Acquafredda [advanced Agri-PV plants](#), both located in the Campania region. In March, two RWE wind farms were awarded contracts in [the FER1 auction](#): the 45 MW Venusia wind farm in the Basilicata region and the 48 MW Serra Palino wind farm in the Apulia region. Construction of both new wind farms is expected to start shortly.

RWE

RWE is leading the way to a modern energy world. With its investment and growth strategy, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. Thanks to its integrated portfolio of renewables, battery storage and flexible generation, as well as its broad project pipeline of possible new builds, RWE is well positioned to address the growing global demand for electricity, particularly driven by further electrification and artificial intelligence. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.
