

Press release

RWE successful with four wind and solar projects in Italian renewables auction

- **Contract for difference awarded to four projects with a combined capacity of 68 megawatts across Italy: Serra Giannina wind farm in Basilicata, Ponte Valentino 1 & 2 solar plants in Campania, Carcitella Agri-PV plant in Sicily**
- **Construction scheduled to start in 2026**

Essen/Rome, 4 December 2025

Four RWE projects were awarded a contract for difference (CfD) in the latest Italian renewables auction, FER-X. The Serra Giannina wind farm, which will be installed in Potenza in the Basilicata region, will have six turbines with a total capacity of 42 megawatts (MW). Two ground-mounted solar plants, Ponte Valentino 1 & 2, with approximately 32,000 solar modules and a total capacity of 17.65 MWac, will be installed in Benevento in the Campania region. The 8 MWac Agri-PV plant Carcitella, which includes approximately 13,000 solar modules mounted on high-tracker systems, will be located in Sicily. Construction of all four projects is scheduled to start in 2026.

Katja Wünschel, CEO RWE Renewables Europe & Australia:

“This auction success is a fantastic milestone. Besides further solar projects it includes our 20th onshore wind farm in Italy. We are proud to further support the country’s ambitious expansion goals. Looking ahead to upcoming auctions, aligning auction values with real technology costs will be key to unlocking even more capacity and accelerating Italy’s energy transition.”

RWE Renewables Italia – strong presence in Italian market for renewables

RWE is a key player in the Italian renewables market. The company takes an integrated project approach that incorporates the development, construction and operation as well as the marketing of wind farms and solar plants. RWE operates 17 onshore wind farms in Italy, with a combined installed capacity of 598 MW – enough to supply more than 500,000 Italian households with green electricity every year. In addition to its first commercial-scale [Agri-PV plants](#) Morcone (9.8 MWac) and Acquafredda (9.3 MWac) in the Campania region, RWE is constructing [two new onshore wind farms](#): The 47 MW Serra Palino wind farm is located in the Apulia region and the 45 MW Venusia wind farm in the Basilicata region. In addition to the FER-X auction, RWE was successful in the latest Agri-PV auction with [three projects](#) totalling 30.2 MW.

RWE

RWE is leading the way to a modern energy world. With its investment and growth strategy, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. Thanks to its integrated portfolio of renewables, battery storage and flexible generation, as well as its broad project pipeline of possible new builds, RWE is well positioned to address the growing global demand for electricity, particularly driving by further electrification and artificial intelligence. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations, and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
